

Here, I've crafted three scenarios showcasing the app's functionality on campus from different perspectives.

Scenario 1: This scenario is focused on a student who wants to leave his class early to get to his next one on time. Here, he can check his schedule to be aware of what classes have a close timeframe, and send voucher requests to classes he wants to get to early

Scenario 2: This scenario is focused on a teacher who wants to automatically make their class available for anyone who needs to get there early. She can accept individual requests, or send a blanket one for everyone

<p>Welcome to tracker! Please select your role:</p> <p>Student</p> <p>Staff</p>	<p>You've selected staff! Please enter your login information or sign up if you haven't already</p> <p>Username</p> <p>Password</p> <p>Sign Up</p>	<p>Would you like to set up an automatic voucher for your class, or check your inbox for incoming requests?</p> <p>Set up automatic voucher</p> <p>Open Inbox</p>
<p>Please select what time you'd like your automatic voucher to go off</p> <p>Enter time here</p>	<p>You've selected 40 minutes before class. Would you also like to view your inbox for voucher requests?</p>	<p>You have 3 requests:</p> <p>David</p> <p>Janice</p> <p>Allison</p>

Scenario 3: This scenario focuses on a shuttle driver. If the driver wants to adjust their schedule due to trains or traffic, they can shift their route by a certain amount of time (provided the campus authorizes it).

Since you are a bus driver, would you like
to view your route, or adjust it for
vouchers?

View route
Adjust route

You've chosen to adjust your route.
Please select the time-shift for when
vouchers enable

Set time here

You've adjusted your route by 20 minutes for the
voucher! Would you like to send this notification to
all other staff using this app?
